CINEMATECH INTRODUCES A REVOLUTIONARY ZERO WALL, INCLINER MECHANISM

ADDISON, TX, JULY 30TH, 2003: CinemaTech is proud to announce the debut of our new ZERO WALL series of seating. We have combined the style and elegance of our most popular selling seat with the mechanical innovation of the incliner to create the Valentino II.

The Valentino II represents the culmination of two years of work from the renowned European designer Wolfgang Setz. This seat carries the tradition of CinemaTech's exclusive German manufactured all Steel Frame and patent pending Articulating Headrest. The Zero Wall series is the perfect solution for the home theater enthusiast with space constraints. This mechanism allows you to virtually place the chairs flush with the wall. The Valentino II has full range of motion and glides smoothly forward as it opens to the full incline.

The Valentino II along with additional Zero Wall models with is on display for viewing at CEDIA EXPO 2003 – booth number 105. We look forward to seeing at the EXPO.

We now stock the Valentino for immediate delivery. All stocked Valentino models are motorized, high back (PA) and covered in black grade 2 leather.

For further information, please visit the CinemaTech web site at www.MyCinemaTech.com.
