

Leather Grade I Z51 *a durable family leather*

This strongly pigmented, smooth leather has been chrome-tanned then drum dyed and features a slightly matte finish and a particularly even structure and color. Being especially low-maintenance and light-fast, the leather is best suited to everyday use.

Leather Grade II Z69 *soft vintage look*

The appeal of the fine-grained, covered soft leather, is in its exceptional softness with a trendy, "vintage" appearance and featuring a delicately matte finish. This fine leather gets its high-end character from this multi-tone effect with silky shine and fine grain.

Thickness:	0.9 - 1.1 mm

Leather Grade II **Z73** *natural feel leather*

A luxury, natural, milled leather made from superior rawhides. It has an attractive softness with a good feel and a slightly satin finish. Its natural grain results from a combination of an up-to-the-minute tanning technique and a milling process performed at the perfect temperature, without mechanical embossing.

Leather Grade II Z75 *soft and luxurious*

A luxurious, natural, milled leather made from specially selected rawhides. It has a very attractive softness and a good feel and its thickness shows off the structure particularly well. The leather has been given a slightly satin finish. Its natural grain results from a combination of an up-to-the-minute tanning technique with a milling process at the perfect temperature.

Thickness:	1.5 - 1.7 mm

Leather Grade III Z79 *exclusive & soft*

A member of the aniline touch leather family with a persuasively pleasant feel. The softness inside also makes it comfortable to sit on. Its elegant, nappa/milled grain appearance and its surface, which has been refined using an undulating printing process, give the leather its unique appearance.

ATTENTION – because of the variations in color that are created by the undulating surface, differences in color are typical! This is one of the main features of Z79 and it shows how unique and exclusive this leather is!

Leather Grade III Z87 *anilux deluxe*

A full grain, very unique, natural aniline-nappa-leather. The naturalness, softness and two-colored-effect, characterizes the leather. This leather is especially warm and soft. Because it has no colored finish, it is very breathable, but also very sensitive to spills and stains. Over time it generates the "patina" typical of aniline leather. All natural skin-features (insect bites, scratches, creases, fighting trails, structure- and color-differences) remain to the leather and they are specifically used for visible parts of each seat.
